

Jason Bondurant, E.I.
Consultant

Jason Bondurant, E.I., is a consultant and engineer employed with GCI since 2013. He has experience with both new and remedial construction of the building envelope. As a consultant he provides design, analysis, documentation, project management, forensic investigation, and other associated services. He also provides field engineering services and inspections, including performing special structural building inspections for the City of Miami and Miami Beach. Mr. Bondurant has an emphasis on quality control, and is a strong advocate for the client in the field. He specializes in concrete restoration and waterproofing, and exterior glazing and wall systems.
