

Paul E. Beers
Chief Executive Officer

Paul E. Beers established GCI, an exterior building envelope consulting firm, in 1988. He has over 35 years' experience with the exterior building envelope. Prior to GCI, he was the owner of a contract glazing firm.

Mr. Beers is a leading expert with glazing systems, water leakage, hurricane damage and protection. He was instrumental in the development and implementation of missile impact tests after Hurricane Andrew hit Dade County, FL in 1992 and continues to work with post-hurricane recoveries. He has appeared on nationally televised programs such as CNN, along with interviews by the news media for local television stations throughout the country. He has been quoted in the Wall Street Journal, New York Times, Popular Science, Engineering News Record and many daily newspapers and trade publications, regarding his work with glazing systems.

Mr. Beers has presented technical papers at ASTM symposiums and American Society of Civil Engineer programs, among others. He has been a featured speaker at Florida Department of Insurance, Construction Specifications Institute, ASTM, Glass Association of North America, and the Glass Association of Florida. He has published articles with Progressive Architecture, Glass Magazine, U.S. Glass and Metal, and CSI Magazine and many others.
