

Maria A. Rivera
Project Engineer

Maria Rivera joined the GCI Consultants team in 2015 as a Project Engineer working on a massive restoration project. Her field performance revolved around inspecting glazing and waterproofing systems, testing stucco and concrete to determine what needed to be repaired and making sure that everything met the standards and specifications of the project. In November 2017, Ms. Rivera was promoted to Project Manager working on hurricane wind damage investigations. She will be training and supervising a group of inspectors that will conduct field inspections. Ms. Rivera will supervise the logistics for field tasks and preparation of deliverables. She will assemble draft documents for final review and maintain projects scheduling, budget and documentation.

Ms. Rivera graduated from an ABET-accredited university where she earned a Civil Engineering degree and a Master's degree in Engineering Management. She has experience in construction projects, construction safety, engineering design and drafting.

Ms. Rivera possesses advanced analytical capabilities, is fully bilingual in English and Spanish, and is a dynamic self-starter with excellent teamwork principles. Her strengths include determination, handling responsibility, being detail oriented, and she has quick learning and problem-solving abilities.

Ms. Rivera's goal is to provide unparalleled service to our clients.
